- > semiautomatic production line for windows system in aluminium, aluminium – wood and wood-aluminium
- > production line for façades system

*our philosophy in 5 words*

# TECHNOLOGY

*«we always aim high so as to achieve our goals: continuous enhancement of performances, to meet the demands of consumers»*

Continuously innovating is a visible aim of the entire production chain; from design to installation of each product.

High quality and accuracy in the details, are the 2 pillars of Tekla's manufacture

Choice us means lean on professional services: project, production, after and pre-sales care, marketing, retail logistic, software

**The result: guaranty and uniqueness product**

*our philosophy in 5 words*

---

*«People and human relations  
come first»*

We think that clarity and loyalty to our clients is  
crucial to success

# EMPATHY

# KNOW-HOW

*«we achieve outstanding performances in everything we do»*

we need to test our aims and the results we can achieve. It means satisfaction but also responsibility. We understand that the best achievements result from different factors, complemented each other.

This persuasion move us towards new challenges, meetings, relations and inspirations. We care about art and culture which represent the road to individual and collective growth.

*our philosophy in 5 words*

«we let leadership be a  
fact, not just a story»

# LEADERSHIP

The harmony between our employees  
adds something special to our products

# ACTION

*«the secret to success is getting started»*

Expert advice and technical assistance in construction site, planned maintenance service, call center and customer care, energy-acoustic performance certificate, events and professional training.  
We pay attention to continuous improvement of internal work and services that customer perceives

- › 3500 pieces in a month
- › 450 construction sites
- › 6 designers
- › 5 qualified installation teams

The group was born in 1980 to respond to market needs in terms of quality and quantity. Affirmed over time as a leader in delivering of window in wood-aluminium, aluminium-wood and aluminium, TEKLA is now able to complete each process of production chain.

## **Our strenght: a wide range of systems made in different materials**

The core business: design, fabrication and installation of window systems

In addition to windows system, building envelops, façades, interior doors, security doors and custom-made project are also produced to meet the highest requirements in term of design, quality and energy performances

## made in Italy

*«Each product is tested  
and certified»*

- › CE marking in accordance with UNI EN 14351
- › Thermal isolation in accordance with UNI EN 10077/1-2
- › Patent n. 0001414723 on TK100 Thermotech wood-wood-aluminium system

## Façades

Façade system with mullion/transom is used to build constructions with face widths. Structurally glazed façades may have a linear development or polygonal one.

Façade system with point-fixed through the use of traditional cranes and stainless Steel rotule with perforated and tempered glass (or tempered laminated).

Rear ventilated curtain wall is a complex, multi-layer structural solution; whether for use in private homes or on large commercial projects, offers very good thermal insulation and considerable design freedom for individual

## wood·wood·aluminium

System designed to provide added comfort with valuable and top-quality frame. Wood-wood-aluminium system with its innovative design is geared towards the high requirements of architecture in terms of thermal insulation.

The TK100 Thermotech system is the first to be patented: n. 0001414374 and can be entirely recycled at the end of its life.

## wood·aluminium

Wood refinement and aluminium strength meet in this system. The EcoTherm wood-aluminium system takes full advantage of the potential of both materials. Available in several varieties of wood essence and aluminium colorations.

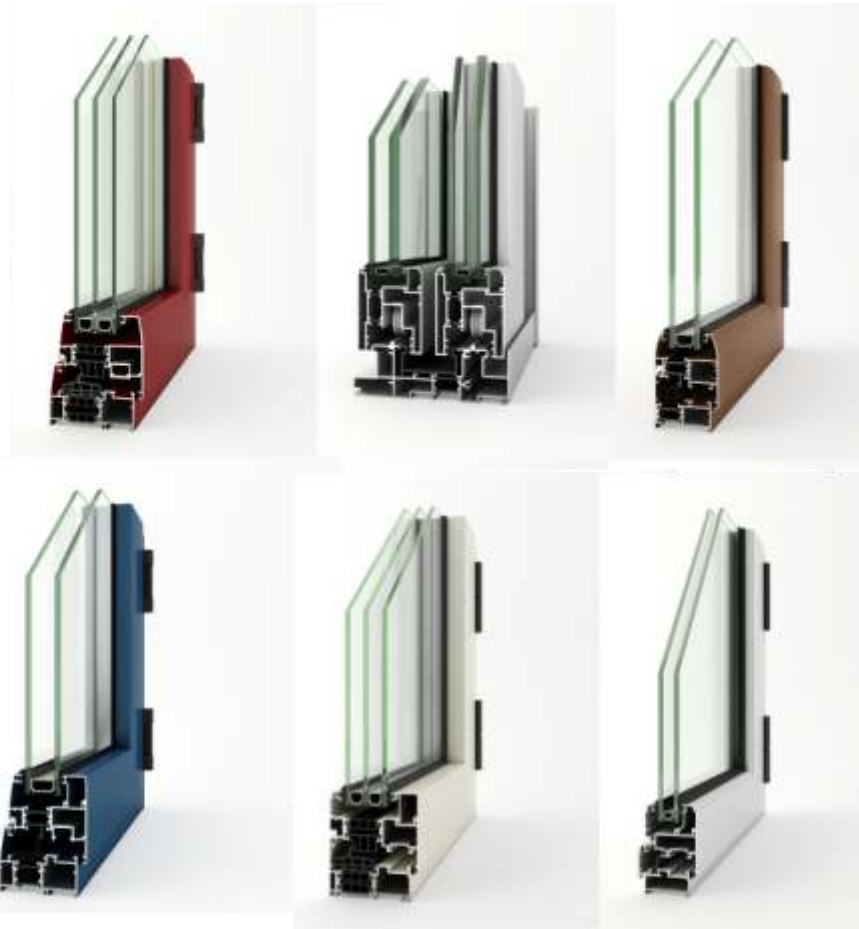

## aluminium·wood

In the Aluminium-wood system with thermal cut, outer aluminum guarantees maximum performance concerning insulation, durability and safety.

## aluminium (thermal cut system)

Aluminium features such as lightness, weathering resistance and low maintenance guarantee lot of benefits. It's an high quality system with a comprehensive range of solutions for any design requirement.

## pvc

PVC systems by Veka are conformed to quality standard of 'Finestra Italiana'. The vast range of styles, finishes and functions to suit any location meets most demanding standard.
